Fiscal Research Center

Georgia's Rankings Among the States:

Budget, Taxes and Other Indicators

ABOUT THE FISCAL RESEARCH CENTER

Established in 1995, the Fiscal Research Center (FRC) provides nonpartisan research, technical assistance and education in the evaluation and design of state tax and economic policy. FRC's responsibilities include developing estimates for tax-related fiscal notes, writing the Georgia State Tax Expenditure Budget, supporting the state's economist, and conducting policy and academic research on a variety of topics associated with state tax policy issues.

FRC Reports, Policy Briefs, and other publications maintain a position of neutrality on public policy issues in order to safeguard the academic freedom of the authors. Thus, interpretations or conclusions in FRC publications should be understood to be solely those of the author(s).

For more information on the Fiscal Research Center or for additional copies of this report, please call 404-413-0249 or visit our website at: frc.gsu.edu.

ACKNOWLEDGEMENTS

This guide mirrors the format and content of the annual report, "Virginia Compared to the Other States," produced by Virginia's Joint Legislative Audit and Review Commission. We would especially like to thank Joe McMahon, Senior Legislative Analyst, and Kathy DuVall, Publications Analyst, for their assistance during the production of the inaugural 2015 guide. Additionally, appreciation goes to Elton Davis for creating the first edition of this guide.

Introduction

Enclosed is a collection of quantitative metrics and state rankings that compare Georgia to states across the nation. While several of the comparisons focus on total state or local government revenue and expenditures, the report also includes a number of measures that provide comparisons of either expenditures or state characteristics within specific functional areas, such as education, health, and transportation. The state rankings for each topic are generally (with a few exceptions) determined by the reported total dollar value or percentage, with the highest state value or percentage ranked number one. This 2021 edition is an annual publication from the Fiscal Research Center. We hope it will serve as a convenient reference guide for policymakers, the media and the public.

Sources

The 37 metrics contained within the report are based upon data from a variety of sources. Each metric within the report contains a listing of the sources used to produce the reported information. Although each source is updated periodically in accordance with its own unique schedule, we have made an attempt to use the latest information available for each measure. A partial list of the data sources includes:

- ▶ U.S. Census Bureau, Annual Population Estimates
- ▶ U.S. Census Bureau, Annual Surveys of State and Local Government Finances
- ▶ U.S. Census Bureau, Poverty: American Community Survey Briefs
- ▶ Bureau of Economic Analysis
- ► College Board, Trends in College Pricing
- $\,\blacktriangleright\,$ National Association of State Budget Officers State Expenditure Report
- ▶ State Higher Education Executive Officers Association
- ▶ Bureau of Labor Statistics
- ▶ Centers for Disease Control and Prevention

Quick Stats

▶ In FY 2018, Georgia's state and local revenue from own sources as a percentage of personal income was unchanged from FY 2017 and was second lowest in the southeast.

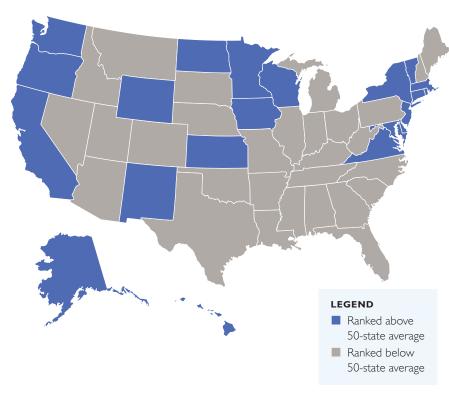

Note: Values presented in the table are rounded to one decimal. States that have similar values but different rankings indicate that the value differs beyond the first decimal.

Quick Stats

- ▶ The percentage of persons under 65 covered by health insurance in Georgia increased from 84.3 to 84.5 percent between 2018 and 2019.
- ▶ Nationally, the percent insured under 65 decreased from 89.6 to 89.2 percent.
- ▶ In 2019, 67.5 percent of Georgians under 65 years of age had private insurance, either alone or in combination with public health insurance. The comparable figure for 2018 was 67.1 percent.

Note: Values presented in the table are rounded to one decimal. States that have similar values but different rankings indicate that the value differs beyond the first decimal.

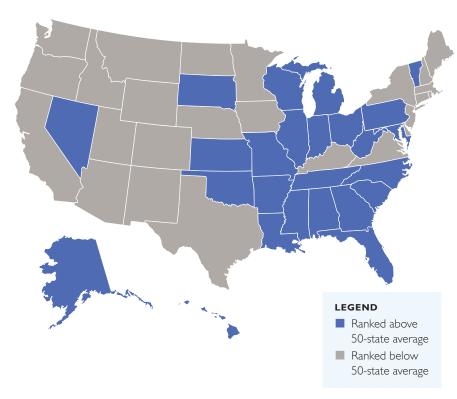

Source: U.S. Census Bureau, American Community Survey

^{*}Percentages for private/public health insurance do not add to total coverage because some individuals report having health insurance coverage from both private and public sources.

Quick Stats

▶ In 2018, Georgia had 131,128 FTE state government employees.

Notes:

- I. Full-time equivalent (FTE) is a computed statistic representing the number of full-time employees that could have been employed if the reported number of hours worked by part-time employees had been worked by full-time employees. This statistic is calculated by dividing the "part-time hours paid" by the standard number of hours for full-time employees and then adding the resulting quotient to the number of full-time employees.
- 2. FTE per 100 persons is calculated as state government FTE divided by state population in hundreds of persons.
- 3. Values presented in the table are rounded to zero decimals. States that have similar values but different rankings indicate that the value differs after considering decimal values.

AUTHOR BIOS

Robert Buschman is associate director of the Fiscal Research Center and is the Center's key contact for fiscal notes. His research interests include corporate and personal taxation, public expenditures, macroeconomic policy, history of economic thought, and economic history. Prior to joining the Andrew Young School, Bob worked for several years in corporate banking and corporate financial management. Bob holds a BA in economics from Duke University, an MBA in finance from the Goizueta Business School at Emory University, and an MA and PhD in economics from the Andrew Young School of Policy Studies at Georgia State University.

Justin Thurman is a public finance fellow at the Center for State and Local Finance (CSLF) and the Fiscal Research Center (FRC). He is currently pursuing a master's degree in economics at Georgia State. Before studying economics, Justin worked as a freelance writer and novelist. His areas of interest include tax policy, international finance, and econometrics.
