Fiscal Research Center

Georgia's Rankings Among the States:

Budget, Taxes and Other Indicators

ABOUT THE FISCAL RESEARCH CENTER

Established in 1995, the Fiscal Research Center (FRC) provides nonpartisan research, technical assistance and education in the evaluation and design of state tax and economic policy. FRC's responsibilities include developing estimates for tax-related fiscal notes, writing the Georgia State Tax Expenditure Budget, supporting the state's economist, and conducting policy and academic research on a variety of topics associated with state tax policy issues.

FRC Reports, Policy Briefs, and other publications maintain a position of neutrality on public policy issues in order to safeguard the academic freedom of the authors. Thus, interpretations or conclusions in FRC publications should be understood to be solely those of the author(s).

For more information on the Fiscal Research Center or for additional copies of this report, please call 404-413-0249 or visit our website at: frc.gsu.edu.

ACKNOWLEDGEMENTS

This guide mirrors the format and content of the annual report, "Virginia Compared to the Other States," produced by Virginia's Joint Legislative Audit and Review Commission. We would especially like to thank Joe McMahon, Senior Legislative Analyst, and Kathy DuVall, Publications Analyst, for their assistance during the production of the inaugural 2015 guide. Additionally, appreciation goes to Elton Davis for creating the first edition and to Robert D. Buschman, Ph.D. for his many years of editing this guide.

Introduction

Enclosed is a collection of quantitative metrics and state rankings that compare Georgia to states across the nation. While several of the comparisons focus on total state or local government revenue and expenditures, the report also includes a number of measures that provide comparisons within specific functional areas, such as education, health, and transportation. The state rankings for each topic are generally (with a few exceptions) determined by the reported total dollar value or percentage, with the highest state value or percentage ranked number one. This 2024 edition is an annual publication from the Fiscal Research Center. We hope it will serve as a convenient reference guide for policymakers, the media, and the public.

Sources

The 37 metrics presented in this report are based on data from a variety of sources, listed at the end of each metric's section. We have strived to include the most recent information available for each measure, although each source is updated according to its own schedule. A partial list of the data sources includes:

- ▶ U.S. Census Bureau, Annual Population Estimates
- ▶ U.S. Census Bureau, Annual Surveys of State and Local Government Finances
- ▶ U.S. Census Bureau, Poverty: American Community Survey Briefs
- ▶ U.S. Bureau of Economic Analysis
- ► College Board, Trends in College Pricing
- ▶ National Association of State Budget Officers, State Expenditure Report
- ▶ State Higher Education Executive Officers Association
- Bureau of Labor Statistics
- ▶ Centers for Disease Control and Prevention

▶ Georgia has maintained a AAA rating from S&P since 2001. Outlook is stable per S&P, Moody's. and Fitch as of June 2023.

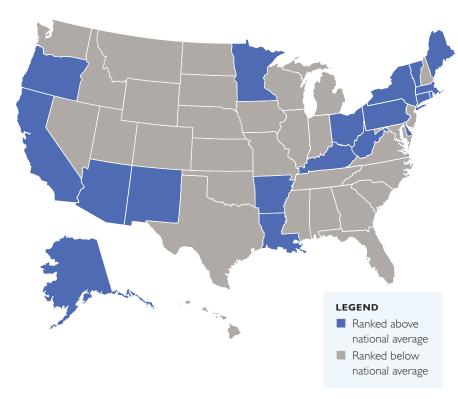

Notes:

- 1. States are ranked based on the average value of their bond ratings on a 10-point scale, with AAA rating equal to 10 points.
- 2.* indicates states with no outstanding general obligation debt. As such, the ratings shown are those the state would likely receive if they chose to issue general obligation debt.

- ▶ In 2021, Georgia had 122,754 FTE state government employees. Its workers per 100 persons is unchanged from 2020.
- ▶ The 50-state average of 1.62 decreased from 1.65 in 2020.

Notes:

- I. Full-time equivalent (FTE) is a computed statistic representing the number of full-time employees that could have been employed if the reported number of hours worked by part-time employees had been worked by full-time employees. This statistic is calculated by dividing the "part-time hours paid" by the standard number of hours for full-time employees and adding the resulting quotient to the number of full-time employees.
- FTE per I 00 persons is calculated as state government FTE divided by the state population in hundreds of persons.
- 3. Values presented in the table are rounded to two decimals. If states have similar values but different rankings, then their values differ beyond the second decimal.
